

Nuts and Bolts

Product Description/ Specification:

BS Stainless supply a wide range of nuts and bolts manufactured from stainless steel, Galvanized and zinc plated steel. The standard sizes available are listed below.

As a standard we supply fully threaded hexagonal bolts, also referred to as ‘Set Screws’ with matching hexagonal nuts. In addition, we can also supply part threaded bolts if requested and specified at the time of enquiry.

All thread, also described as threaded bar is available in a metre length, matching nuts can be supplied.

Products are sourced from suppliers who meet our stringent quality requirements. Detailed analysis of these suppliers are carried out to ensure compliance with BS EN ISO 9001 : 2008 management system. All nuts and bolts are produced to meet DIN 933/934 ISO 4017/4032 quality standards.

Further data on the Mechanical and physical properties of the materials can be supplied on request.

Dimensions:

Standard size range:

	d (mm)	Length (mm)		K (mm)	S (mm)
		Min	Max		
M6	6	8	60	4	10
M8	8	10	120	5.3	13
M10	10	16	120	6.4	17
M12	12	16	120	7.5	19
M16	16	25	120	10	24
M20	20	25	120	12.5	30

Fully Threaded
‘Set Screw’

Partially Threaded

Packaging:

Nuts and bolts are normally packed in the same cardboard box but unassembled in units to suit the order. Alternative packaging can be arranged subject to availability. Material will be packed on wooden pallets approximately 1000mm x 1100mm and shrink wrapped. Heat treated pallets will be supplied where requested.

Safety:

There are no known health risks in handling these materials although it is recommended that gloves should be worn in case of sharp edges. Good lifting practice techniques should always be followed when handling these products.

For more details on safety, please refer to MSDS available on our website.
