## MATERIAL DATA SHEET

SoundMet ${ }^{\circledR}$ acoustic insulation jacketing is an innovative metal jacketing developed by BS Stainless Limited. In SoundMet, the base metal and Mass Loaded Vinyl (MLV) are bonded together to provide superior acoustic damping in insulated pipelines.

Most popular base metals are Stainless Steel and Aluminium. Other metals like Aluzinc and Aluminised Steel can also be supplied if requested. The MLV is a vinyl sound barrier loaded with Barium Sulphate minerals. The Jacketing is ISO 15665 approved and is an effective system for all classes of acoustic insulation.

SoundMet with enhanced properties of MLV is also available on request:
(II)

SoundMet Low Temp: Retains superior acoustic properties even at $-58^{\circ} \mathrm{F}\left(-50^{\circ} \mathrm{C}\right)$ (For Arctic region)
(11)) SoundMet Fire: High fire rating

| PHYSICAL PROPERTIES (MLV) |  |
| :---: | :---: |
| Colour | Black |
| Hardness | 85 Shore A |
| Weight | $5 \mathrm{Kg} / \mathrm{m}^{2}\left(1.0 \mathrm{lb} / \mathrm{ft}^{2}\right)$ <br> $7.5 \mathrm{~kg} / \mathrm{m}^{2}\left(1.5 \mathrm{lb} / \mathrm{ft}^{2}\right)$ <br> $10 \mathrm{~kg} / \mathrm{m}^{2}\left(2 \mathrm{lb} / \mathrm{ft}^{2}\right)$ |
| Tensile Strength | 1.5 Mpa |
| Elongation at Break | $125 \%$ |

## Benefits to insulation system:

- Excellent sound dampening
- Prevents moisture ingress
- Improved seal at overlaps
- Minimises slippage of vinyl in vertical installations
- Corrosion resistance
- Quicker application
- Labour saving

## Safety:

Please refer to the Product Material Safety Data Sheet*.
