

Sign Banding System

Product Description/ Specification:

Bandfix® Stainless Steel sign banding is an ideal solution for securing signs to posts and other products like bins and cables. The combination of light weight easy to handle individually boxed coils along with the strength, rigidity and corrosion resistance represents great value and an ideal sign fixing solution.

These coils are supplied in Stainless Steel grade 201 which is non magnetic and offers good corrosion resistance. All Bandfix® sign band products are supplied with a safe edge, packed in individual cardboard boxes.

The product is supplied in securely-rolled lengths of 100ft/30m with a choice of widths to suit any application.
