

Bandfix® - Stainless Steel Value Band

Product Description/ Specification:

Bandfix® Value band is a perfect solution for many applications including bundling of cables and hoses, insulation or for strapping. It is good for clamping and gives you the flexibility of being able to cut on site to the required length, reducing scrap. The combination of light weight, easy to handle, individually boxed coils along with the flexibility and economies represents great value.

These coils are supplied in stainless steel grades 304 and 316 which are non magnetic and offer good corrosion resistance. All Bandfix® band products are supplied with a safe edge in an individual handy carry cardboard box.

The product is supplied in securely-rolled lengths of 100ft/30m with a choice of widths to suit any intended purpose.

- 300 Series Stainless Steel
- Economical
- Ease in handling and installation
- Light duty banding application
- Can be applied using Bandfix® banding tool
